

Physical education class no option at Conestoga

By Andrew Jackson

Like Rutgers's idea of allowing students to choose physical education from the general education credits, the Plymouth Community College program is another example of how to get a physical education credit as well as a degree. The physical education program was set up to allow students to get a physical education credit as well as a degree.

"I would give students a well-rounded education," said Jackson. "Not just in the classroom, but also in the gymnasium, and allow them to choose what they want to do."

However, the idea has not been accepted by the faculty of Plymouth Community College.

Although the college has not accepted the idea, the faculty of Plymouth Community College has not accepted the idea.

As far as physical education is an option, it is not an option.

Stress has the underpinnings of good and bad, and that's the reason for calling it stress. It is a large field of study. There were the different groups working along with some of these stressors. It is a very good idea.
